

WORK SMART, NOT WORK HARD

Inspired by the capabilities of Industrial Automation, the team at RIOTEC are passionate about empowering customers to improve efficiencies through Fixed-mount barcode scanners.

For scanning applications in warehouse, distribution center, and production lines where items move along a conveyor belt, Fixed-mount scanners can automatically detect and scan barcodes as they pass through the process. Fixed-mount barcode scanners minimize the risk of missed scans and eliminate the need to have a person manually scan each item.

RIOTEC always supplies the suitable Fix-mount scanners to customer.

- Can get the barcode data accurately.
- Simply the job procedure
- Reduce the cost and improve the competition.

Finally, if you have interest, kindly contact us any time. :
